

BioFlaxElite™ Flax Products

Clean, Pure, Non-GMO Flax

More and more consumers are looking for clean, pure, nutrient rich products. How can an industry guarantee these standards? Suppliers must take responsibility for their products through extensive sourcing efforts, third party testing, and proven production procedures to ensure their products not only meet but surpass these standards. Bioriginal Food & Science Corp. embraces this responsibility with **BioFlaxElite™**, offering you an advantage over other flax products.

The BioFlaxElite™ Advantage

BioFlaxElite™ is a clean, pure range of flax products guaranteed to be non-genetically modified. Grown in the pristine prairies, and processed through Bioriginal's exclusive Bio-Elite® Quality Assurance System, this nutrient-rich, natural flax product is produced free from the pollution of the large cities in a clean, pure environment.

Our agronomists carefully select seed varieties each spring, and work with a set of proven growers who produce flax for Bioriginal. However, experience and seed selection are not enough to guarantee a crop qualifies for a **BioFlaxElite™** product. Once the seeds are harvested each lot must be cleaned to remove immature seeds and particulate, guaranteeing 99% pure flax. Both the milled seed and the oil is tested by a third party laboratory to verify **BioFlaxElite™** is free from herbicides, pesticides, and heavy metals. Following these purity tests, Bioriginal is the only supplier who works with a third party laboratory, to further scrutinize each lot at the DNA level to guarantee every batch of Bioriginal's **BioFlaxElite™** is Non-GMO.

Our entire process follows the strict guidelines of our Bio-Elite® Quality Assurance System. Through this system we guarantee that each lot of **BioFlaxElite™** is traceable back to the farm gate; cleaned to 99% purity; tested by third party laboratories; processed in a GMP-certified facility; is Kosher (Pareve), and California Proposition 65; and surpasses international standards for plant-based oils. **BioFlaxElite™** ensures you receive a clean, pure, non-GMO flax product that your customers can trust.

BioFlaxElite™ is available in both conventional and organic flax oils as well as milled flaxseed.

BioFlaxElite™ Guarantees:

- Non-GMO verified at the DNA level
- Manufactured to Good Manufacturing Practices (GMP)
- Produced according to Bioriginal's Bio-Elite® Quality Assurance System
- Traceable to farm gate
- Chemical and irradiation-free processing
- Kosher (Pareve)
- California Proposition 65
