

# Incromega Fish oil Concentrates

Incromega omega-3 oils are pure, pharmaceutical grade fish oil concentrates formulated to provide the recommended omega-3 doses for heart, joint, brain, eye, and inflammatory response health. Purified through Croda's PureMax Molecular Distillation Technology, the Incromega range of omega-3 fish oils are manufactured to industry leading purity standards. This process results in **ethyl esters** that exceed all purity standards recommended by the Council for Responsible Nutrition (CRN). Incromega **triglyceride oils** contain up to 90% fewer impurities, such as PCBs, than CRN standards.

Bioriginal offers Incromega oils as omega-3 triglycerides or ethyl esters. All our Incromega oils are purified to ensure low odor, bland taste, and pale colour.

## Applications

Omega-3 Dietary Supplements: Incromega oils are specially formulated for heart, joint, brain, eye, immune and inflammatory response health. They are available in high dose softgels, flavored liquid oils and oil blends.

## Quality Assurance

- Purified through PureMax Molecular Distillation
- Up to 90% fewer PCBs in **triglyceride oils** than the CRN Monograph recommendations
- Manufactured to international standards for Pharmacopoeia
- Manufactured to pharmaceutical level Good Manufacturing Practices (GMP)
- Proposition 65 compliant at high doses

## Benefits

- Controlled EPA/DHA concentrations ranging from 33% to 70%
- Industry-leading purity, guaranteeing Incromega oils as safe
- Minimal color, taste and odor
- Low peroxide and para-anisidine values guarantee shelf life
- Low in cholesterol and saturated fat

Product Name	Product Form	Total Omega-3	EPA	DHA
Incromega DHA500TG SR	Triglyceride	Min 65%	≤ 100mg/g	Min 500mg/g
Incromega EPA500TG SR	Triglyceride	Min 65%	Min 500 mg/g	≤ 60mg/g
Incromega TG3322	Triglyceride	Min 60%	Min 33%	Min 22%
Incromega E3322	Ethyl Ester	Min 65%	Min 33%	Min 22%
